SUMMARY

Computer Science student specializing in data analytics with experience in Python, SQL, and business intelligence tools. Skilled in analyzing complex datasets, developing data-driven insights, and translating findings into actionable strategies to support business decision-making.

EDUCATION

Wilfrid Laurier University – Waterloo, ON

Honors Bachelor of Science in Computer Science (Big Data Concentration) | September 2023 - June 2027

- Onyx Scholar (prestigious leadership and academic excellence program)
- Director of Black Student Association (Marketing Coordinator)
- Vice President, Virtual Reality Laurier (2025)
- John C. Holland Award Recipient (2023)

SKILLS

Programming Languages & Tools: Python, SQL, Java, JavaScript, C++, HTML, CSS

Tools & Platforms: Tableau, Power BI, AWS, Git, GitHub, Firebase, REST APIs, VS Code, Excel (Pivot Tables, VLOOKUP, Data Analysis)

Analytical Skills: Data Analysis, Quantitative Modeling, Statistical Analysis, Data Visualization

Business & Marketing Skills: Go-To-Market (GTM) Strategy, Data Analysis & Metrics Tracking, Market Research & Insights, Stakeholder & Partner Management, Product Positioning & Messaging

Soft skills: teamwork, communication, creative thinking, analytical problem-solving, adaptability, and leadership.

EXPERIENCE

Operations Officer Intern | Royal Bank of Canada (RBC) | Remote | May 2025 – August 2025

- Analyzed and processed high volumes of financial data with 98%+ accuracy, ensuring compliance with banking standards.
- Identified inefficiencies in operational workflows, reducing processing time by 20% through process improvements.
- Investigated and resolved complex client issues by interpreting financial information and system outputs.
- Collaborated with cross-functional teams to support decision-making and improve client satisfaction by 15%

Customer Service Representative | Well Wise Home Health & Wellness | Cambridge, ON | June 2024 – Present

- Delivered timely solutions to **100+** customer inquiries and complaints weekly, resolving issues to increase customer satisfaction.
- Ensured accurate transaction and inventory processing, enhancing data accuracy and operational transparency.
- Collaborated with advisory teams to provide insights that supported strategic improvements, raising CSAT scores by **15%**.

Web Developer Intern | House of Praise | Mississauga, ON | July 2023 – September 2023

- Designed and built an entire intranet system that uses **SQL databases for data storage, retrieval, and analytics.**
- Improved application performance by analyzing user interaction data, resulting in a **30%** boost in user engagement.
- The team created REST APIs that allowed for easy administration and processing of structured data.
- The team ran debugging and testing to ensure **data integrity and system operating functions.**

PROJECTS

Laurier VR Hackathon (Vice President, Virtual Reality Laurier) | November 2025 – Present

- Leading cross-functional teams and external collaborators to plan and launch a large-scale hackathon, coordinating stakeholders to deliver a cohesive product and event experience
- Promoted collaboration between developers, designers, and marketers to ideate and prototype innovative VR solutions.
- Boosted engagement by **60%** through digital campaigns and inclusive community events.

Internal Intranet Portal (House of Praise)

- Created a data-driven web application that utilizes **SQL for data administration and querying**.
- The relational databases were created using organized design and performance optimization techniques, resulting in improved **data access and operational efficiency**.
- The system created a single data access point from which users were able to obtain information required for **operational analysis and decision-making processes**.
- Developed data visualizations and dashboards using Power BI/Tableau to communicate key performance insights

RELEVANT COURSEWORK

- **Data Structures & Algorithms:** Implemented sorting algorithms, binary search trees, hash tables, and graph traversal algorithms in Java and Python
- **Database Systems:** Designed and optimized relational databases, wrote complex SQL queries, and implemented database normalization.
- **Object-Oriented Programming:** Built applications following OOP principles, design patterns, and best practices for maintainable code.
- **Machine Learning:** Applied regression, classification, and clustering algorithms to real-world datasets using Python libraries such as Pandas and Scikit-learn.

VOLUNTEER EXPERIENCE

Vice President of Marketing | Virtual Reality Laurier | January 2025-Present

- Led cross-disciplinary teams to plan Laurier's first VR hackathon (2026), promoting innovation and collaboration.
- Increased club engagement by **60%** through strategic digital campaigns and event outreach.

Marketing Coordinator | Laurier Black Student Association | September 2023-Present

- Developed and carried out a go-to-market campaign, analyzing engagement metrics to refine strategy and increase participation by 60%.
- Collaborated with executive teams to promote inclusive events and cultural initiatives across campus.
- Collaborated with internal stakeholders to align messaging and improve outreach effectiveness across diverse student audiences.
- Created content and presentations to communicate campaign strategies and results to stakeholders.

Technical Assistant | House of Praise | September 2022 – Present

- Provided live technical support for events with **1,000+** attendees, ensuring system reliability and performance under pressure.
- Trained new volunteers in troubleshooting and equipment operations, fostering teamwork and leadership.

INTEREST:

I have a strong interest in financial services, digital strategy, and leveraging data to improve client experience and business decision-making.
